Abstract: The Historical Archive of the Faculty of Medicine was formed fundamentally with the documentation produced by the Faculty of Medicine from their creation as a Medical Sciences establishment in (1833) until the first half of the XXth century. The archive receives documentation generated by the current Faculty of Medicine that is no longer effective from the administrative point of view. The heritage is also integrated by collections and documentation of independent (doctors) that were donated by their relatives for its safeguards and diffusion of this information. The Historical Archive is located in the building that was previously the Saint Inquisition and where the School of Medicine was located from the XIXth century up until the first half of the XXth century. **SERVICES:** The Historical Archive is open to researchers Monday thru Friday from 10:00 am to 2:00 pm. The Historical Archive will only allow access to adult researchers, supported by a public or private institution, and independent researchers who warranty this quality with their publications. The Archive provides photocopying services of the materials which are determined by the condition of the documents. The certification and reproduction of images by any means (photographic, digital, or video cameras, etc), requires special permission that will be obtained by a written application indicating how the use will be given to the reproduction. This application will be negotiated in the coordination of the Archive. In cases where the images are used in a publication, the applicant commits to grant the credit corresponding to the institution. The application will accompany with a relationship in which should be pointed out: the classification and characteristic of the material that individuals want to reproduce.

Holdings: Documental Group: Protomedicato. Protomedicato was a court established by Spanish royalty to watch over the professional practice of physicians, surgeons, pharmacists, and midwives. In New Spain, Protomedicato royal court was integrated through the Royal Warrant, lengthening its functions up to 1831 when its suspension was ordered. Volume. 17 volumes, 368 files Period. XVIII and XIX Centuries (1744-1831) Kinds of Documental. Manuscripts and Printings Description. Edicts, letters, copies of royal warrants, pharmacists, surgeons, druggist, phlebotomists, physicians, obstetrics, and midwives' test files; vaccination decrees, public hygiene information, nominations, etc. Documental Group: Faculty of Medicine. During 1831 the Protomedicato Court is eliminated and replaced with the Medical Faculty of the Federal District (Distrito Federal) consisted of eight medical-surgeon professors, and four pharmacists. This faculty fulfilled almost the same functions than colonial court. Volume. 5 volumes, 198 files Period. XIX Century (1831-1840) Kinds of Documental. Manuscripts and Printings Description. Surgeons, phlebotomists, obstetric pharmacists, and physicians test files, drugstore visits information, criminal causes for medical practice without degree, and drugstore visits requisitions, degrees records, and studies files. Documental Group: Superior Salubrity Council. The council was established on January 4th 1841, and carried out the functions of the institutions that preceded: Protomedicato court and Medical Faculty of the Federal District. Other functions were to supervise the

authorized medical practice, sanitary inspection, application of preventive and emergency standards in natural disasters, epidemics. Volume. 20 volumes, 555 files Period. XIX Century (1841-1868) Kinds of Documental. Manuscripts and Printings Description. Dentists, surgeons, phlebotomists, pharmacist, physicians, and obstetrics' files, degrees registration and renewal, bachelor printed certificate, commission of vaccination, foreign degrees registration, thesis, decrees. Documental Group: Medicine School and students. The university was eliminated and replaced with the creation of the Public Education Head Office, with 6 higher education offices, one of them, Medical Sciences Office, later changed its name by College of Medicine and then by School of Medicine. Since 1854, the school had its own place for an appropriate development: an Inquisition ancient building, where stayed during a century. In 1956 it's moved to the Campus (Ciudad Universitaria) where became later into Faculty of Medicine. During 1910, National School of Medicine along with Professional Education Institutions established the bases of National University.
